Foreword

Africa's Atlantic gateway is being reshaped, and Senegal stands at the forefront of this transformation. By combining responsible resource development with economic diversification, institutional reforms, innovation, and infrastructure development, Senegal is laying the foundation for long-term, inclusive, and resilient growth. For India, this presents an opportunity to deepen engagement with a trusted partner that is increasingly significant within the African continent.

The Chamber of Commerce and Industry of India (CCI India) has consistently believed that India's partnership with Africa should extend beyond traditional markets and embrace emerging economies that offer long-term strategic value. Senegal's strategic geographic location, its strong regional connectivity, and its role as a gateway to Francophone West Africa make it an attractive destination for Indian businesses seeking to expand their presence across the region. Supported by a stable policy environment, growing investment opportunities, and an outward-looking economic vision, Senegal provides an ideal platform for strengthening bilateral trade, investment, technology collaboration, and industrial partnerships.

This Knowledge Paper has been prepared to serve as a comprehensive and reliable reference for policymakers, diplomats, business leaders, investors, and institutions interested in understanding Senegal's economic landscape and the expanding scope of India–Senegal cooperation. It provides an overview of the country's development priorities, key economic sectors, investment ecosystem, policy framework, and areas where the two nations can build stronger commercial and institutional partnerships. The report also explores emerging opportunities across sectors such as agriculture, healthcare, renewable energy, infrastructure, manufacturing, digital technologies, education, logistics, mining, tourism, and the evolving energy landscape.

Beyond identifying opportunities, this publication seeks to promote meaningful dialogue and practical collaboration between stakeholders in both countries. It highlights the role that CCI India can play in facilitating business engagement, fostering investment partnerships, supporting knowledge exchange, encouraging innovation, and creating stronger institutional linkages between the public and private sectors. Through sustained engagement and collaborative initiatives, CCI India remains committed to serving as a bridge that brings together businesses, entrepreneurs, investors, and policymakers from India and Senegal.

Munindra Kumar
Director General
CCI India

SENEGAL

“ Experience vibrant culture and rhythm, where music and tradition thrive.

Introduction

The Republic of Senegal is a West African coastal nation known for its political stability, strong institutions, dynamic culture, and strategic Atlantic port in Dakar. It serves as an economic gateway to the West African region and maintains active partnerships with Europe, Asia, and Africa.

Senegal has a diversified economy supported by services, agriculture, fisheries, mining, and a growing energy sector following offshore oil and gas discoveries. It also maintains a resident embassy in New Delhi, enabling direct diplomatic and economic cooperation with India.

Basic Facts & Demographics

Senegal is a semi-presidential republic with its capital in Dakar, a major economic and maritime hub.

- **Population:** approx. 18.5–19 million (2024–25 estimates)
- **Language:** French (official), with widely spoken national languages such as Wolof, Pulaar and Serer
- **Currency:** West African CFA Franc (XOF)
- **Geography:** Located along the Atlantic, Senegal has a strong trading position due to its port infrastructure and proximity to European and American shipping routes

Economy — GDP, Structure & Recent Performance

Senegal is considered one of West Africa's more resilient economies.

- **GDP (Nominal):** approx. US\$ 34–35 billion (2025, following a 2025 GDP rebasing exercise)
- **Growth Rate:** accelerated sharply to approx. 7–8% in 2024–2025, driven by the start of offshore oil and gas production, with growth expected to moderate to around 4–5% from 2026 onward as initial production effects normalize

Major economic drivers include:

- **Services:** finance, telecoms, tourism, transport
 - **Agriculture:** groundnuts, horticulture, livestock
 - **Fisheries:** one of the most important sectors for export income and employment
- Senegal is recognized for its economic reforms under the Plan Sénégal Émergent (PSE), which focuses on industrialization, infrastructure development and investment promotion.

“Culture and Heritage

The culture and heritage of Senegal are vibrant and deeply rooted in tradition, shaped by diverse ethnic groups such as the Wolof, Serer, and Fulani. Music and dance play a central role in Senegalese life, with styles like mbalax reflecting the country's rich artistic expression. Strong community values, respect for elders, and the concept of teranga (hospitality) define social interactions. Islam is the dominant religion and greatly influences customs and daily life. Historic sites like Gorée Island stand as powerful reminders of the country's past, particularly its role in the transatlantic slave trade.

Bilateral Trade Between India & Senegal

India and Senegal maintain strong and growing trade relations, with bilateral trade generally ranging between \$ 1.2–1.5 billion annually depending on commodity cycles.

India's Exports to Senegal:

- Rice & cereals (largest export category)
- Cotton & textiles
- Pharmaceuticals
- Machinery & engineering goods
- Meat & edible products
- Electrical & electronic equipment
- Automotive components & vehicles
- Chemicals & plastics

Senegal's Exports to India:

- Phosphates & fertilizer inputs
- Cashew & agro commodities
- Seafood
- Scrap and mineral resources

India is a key importer of phosphoric acid and phosphate rock from Senegal, which are critical inputs for its fertilizer industry. In return, India is among Senegal's key suppliers of essential goods, food items, medicines and engineering products.

Economic & Strategic Areas Of Cooperation

• Agriculture & Agri-processing:

India supports Senegal in seeds, irrigation, farm mechanization and agri-processing technology.

• Fertilizers & Minerals:

Senegal's phosphate industry is a backbone of bilateral trade; Indian fertilizer companies maintain partnerships with Senegalese producers.

• Energy & Renewables:

India's expertise in Solar Energy provides opportunities for collaboration, particularly in rural electrification.

• ICT & Digital Services:

Senegal has a strong ICT ecosystem, offering room for cooperation in e-governance, fintech and training.

Opportunities & Risks in Senegal

Opportunities:

- Growing demand for affordable medicines, making India a preferred supplier
- Expanding market for automotive parts, engineering goods, and solar equipment
- High potential in fertilizer partnerships, mining supply chains, and petrochemicals
- Strong scope for Indian investment in agri-processing and seafood value chains

Risks:

- Bureaucratic delays in approvals and public procurement
- Port congestion and shipping delays during peak periods
- Currency fluctuations in the CFA zone
- Competition from European and Chinese exporters
- Occasional regional political tensions, although Senegal remains one of West Africa's more stable countries

Chapter 1: About Senegal

Geography and Strategic Location

The Republic of Senegal occupies the westernmost point of the African continent, bordered by Mauritania to the north, Mali to the east, Guinea and Guinea-Bissau to the south, and the Atlantic Ocean to the west, with The Gambia forming a narrow enclave within Senegalese territory along the Gambia River. Covering approximately 196,700 square kilometres, Senegal's coastline stretches for more than 700 kilometres, anchoring the deep-water Port of Dakar, one of the busiest and best-connected ports on the West African seaboard. Senegal's location roughly five hours by air from Europe, seven from the Americas, and nine from the Middle East and southern Africa has long made it a natural transshipment and logistics hub for trade flows between Europe, the Americas, and West and Central Africa.

Demographics

Senegal's population stood at approximately 18.4 million as of the most recent census-based estimates, with the World Bank and IMF projecting continued growth toward 19–20 million by the late 2020s. The population is notably young, with a median age below 19 years and roughly 60 per cent of Senegalese under the age of 25 a demographic profile that presents both a long-term growth dividend and an immediate youth-employment challenge. Dakar, the capital and primary economic centre, is home to over 3 million people in its metropolitan area; other major urban centres include Touba (the country's second-largest city and spiritual seat of the Mouride Sufi order), Thiès, Rufisque, Kaolack, and Saint-Louis, the historic former colonial capital.

Political System and Administrative Structure

Senegal is a unitary semi-presidential republic and is widely regarded as one of the most stable, uninterrupted multi-party democracies in Africa, having avoided the military coups that have affected several neighbouring states. The President is elected by direct universal suffrage for a five-year term, renewable once, and serves as head of state; a Prime Minister, appointed by the President, heads the government. Following the March 2024 presidential election, Mr. Bassirou Diomaye Diakharr Faye was elected as Senegal's fifth president, with Mr. Ousmane Sonko serving as Prime Minister. The country's legislature is unicameral, comprising the National Assembly. Administratively, Senegal is divided into 14 régions, further subdivided into départements, arrondissements, and communes, providing a structured framework for decentralised governance and local economic planning.

Capital, Currency, and Language

Attribute	Detail
Capital	Dakar
Official Language	French
National Languages	Wolof (widely spoken as lingua franca), Pulaar, Serer, Diola, Mandinka, and others
Currency	West African CFA Franc (XOF), pegged to the Euro at a fixed rate of €1 = XOF 655.957

Attribute	Detail
Regional Blocs	ECOWAS, UEMOA (West African Economic and Monetary Union), African Union, AfCFTA, WTO
Time Zone	GMT+0 (no daylight saving)

Economic Snapshot

Senegal's nominal GDP was estimated at approximately USD 32–33 billion in 2024 by the World Bank, with GDP growth accelerating to roughly 6–8 per cent in 2024–25 on the back of the start of commercial oil and gas production. GDP per capita remains modest, in the range of USD 1,700–2,000, reflecting Senegal's continued classification as a lower-middle-income and least-developed economy by international bodies, even as the hydrocarbon transition is expected to lift medium-term income levels. Services account for roughly half of GDP, industry (including the new hydrocarbon sector, mining, and construction) for around a quarter, and agriculture which employs a disproportionately large share of the workforce for approximately 15 per cent.

Indicator	Value (latest available)
Nominal GDP (2024, World Bank)	~USD 32.3 billion
GDP growth rate (2024)	~6.1% (World Bank)
GDP growth rate (2025, estimate)	~6.7–8.4% (World Bank / national estimates, oil-driven)
GDP per capita (2025 est.)	~USD 1,800–2,050
Inflation (2024)	~0.8% (down sharply from 5.9% in 2023)
Population	~18.4 million
GDP composition	Services ~49%, Industry ~25%, Agriculture ~15–16%
Currency	West African CFA Franc (XOF), euro-pegged

Ease of Doing Business and Investment Climate

While the World Bank discontinued its flagship Doing Business rankings, Senegal continues to be assessed favourably relative to regional peers on investment-climate fundamentals: a stable currency regime by virtue of the CFA franc's euro peg, WAEMU-wide harmonised business law under OHADA (Organisation for the Harmonisation of Business Law in Africa), a functioning single-window investment promotion agency (APIX Agence de Promotion des Investissements et des Grands Travaux), and a relatively liberal Investment Code offering tax holidays, customs exemptions, and export-oriented incentives for qualifying projects. Senegal's membership of the African Continental Free Trade Area (AfCFTA) further positions it as a gateway to a market of over 1.3 billion people across the continent.

Vision Sénégal 2050

In 2024, the new administration launched Senegal 2050 the National Transformation Agenda as a successor to the earlier Plan Sénégal Émergent (PSE). Senegal 2050 sets out a long-term development vision built around economic sovereignty, structural transformation of the productive base, sustainable and inclusive management of natural resources (notably the country's new oil and gas wealth), social equity, and stronger territorial and institutional governance. The agenda places particular emphasis on food sovereignty, industrial diversification away from raw-material export dependence, digital transformation, and a more assertive, sovereignty-oriented approach to managing extractive-sector revenues themes with direct relevance for Indian investors in agriculture, manufacturing, energy, and technology.

Chapter 2: India -Senegal Bilateral Relation

Diplomatic History

India and Senegal established diplomatic relations in 1961, within a year of Senegal's independence from France, reflecting India's early and consistent engagement with newly independent African nations under the framework of South-South cooperation and the Non-Aligned Movement. The Embassy of Senegal in New Delhi was formally opened in 1974 under its first Ambassador, Dr. Babacar Diop, and following an eight-year closure between 1980 and 1988 for economic reasons has operated continuously since its re-opening, with jurisdiction today extending beyond India to Bangladesh, the Maldives, Nepal, and Sri Lanka. India maintains its Embassy in Dakar, with H.E. Shri Dinkar Asthana serving as Ambassador of India to Senegal (concurrently accredited to The Gambia, Guinea-Bissau, and Cabo Verde). The current Ambassador of the Republic of Senegal to India is H.E. Mr. Abdoulaye Barro.

High-Level Visits and Political Engagement

Bilateral engagement has been sustained through periodic ministerial visits, participation by Senegalese delegations in the India–Africa Forum Summit process, and Senegal's continued engagement with India-led multilateral platforms such as the International Solar Alliance and the Coalition for Disaster Resilient Infrastructure. Senegal has been a consistent participant in India's flagship outreach programmes for Africa, including capacity-building and training initiatives under the Indian Technical and Economic Cooperation (ITEC) programme, and academic exchange under the ICCR India-Africa Maitri Scholarship Scheme, which brings Senegalese students to Indian universities annually.

Trade Relations

India is consistently ranked among Senegal's top five trading partners on both the export and import sides. According to UN Comtrade and Observatory of Economic Complexity data, India was the destination for approximately 12–15 per cent of Senegal's total exports in recent years driven overwhelmingly by gold and other minerals while India accounted for roughly 7 per cent of Senegal's imports, chiefly cereals (rice), pharmaceuticals, cotton, machinery, and vehicles.

Trade Flow	Value (2024)	Leading Items
India's exports to Senegal	~USD 950 million	Cereals & rice, cotton, pharmaceuticals, machinery, meat, vehicles, plastics
Senegal's exports to India	~USD 680–900 million	Gold, phosphoric acid, other minerals, groundnuts
Approximate total bilateral trade	~USD 1.6–1.9 billion	

Investment and Development Cooperation

India's economic engagement with Senegal has historically been anchored more in trade and concessional development finance than in large-scale foreign direct investment, leaving significant headroom for growth. India has extended Lines of Credit to Senegal, channelled principally through the Export-Import Bank of India, supporting projects in agriculture, irrigation, water supply, and rural infrastructure sectors of direct relevance to Senegal's food-security and rural-development priorities under Senegal 2050. India has also supported capacity-building through the ITEC programme, which has trained several hundred Senegalese officials and professionals in fields ranging from public administration to information technology and agriculture.

Capacity Building and People-to-People Ties

- ITEC (Indian Technical and Economic Cooperation) programme: annual training slots for Senegalese civil servants and professionals across disciplines including IT, banking, SME development, and diplomacy.
- ICCR India-Africa Maitri Scholarship Scheme: scholarships enabling Senegalese and Gambian students to pursue higher education in India.
- International Solar Alliance: Senegal's participation supports renewable-energy capacity building and technology cooperation with India.
- Indian cultural and community outreach: the Indian community in Senegal, though modest in size, is active in trade, healthcare, and small manufacturing, and Indian cultural events (Yoga Day, festivals) are regularly hosted by the Embassy of India in Dakar.

Indian Companies Present in Senegal

A modest but growing footprint of Indian enterprises operates in Senegal, spanning automobiles and light engineering (with Indian commercial vehicle brands present in the Senegalese market), pharmaceuticals and generic medicines, agro-processing and rice trading, textiles, and IT/BPO services. Indian private-sector engagement remains concentrated in trade and distribution rather than large manufacturing investment representing precisely the gap that CCI India's facilitation efforts.

Future Prospects

The convergence of Senegal's Vision 2050 industrialisation and food-sovereignty agenda with India's African outreach strategy, its pharmaceutical and generic-medicine export strength, its solar manufacturing capacity, and its digital public infrastructure model (increasingly of interest to African governments seeking their own digital ID, payments, and e-governance systems) creates substantial headroom for a deeper economic partnership over the coming decade. Priority areas for near-term deepening include a bilateral Investment Promotion and Protection Agreement, expanded Lines of Credit for agriculture and infrastructure, and structured private-sector engagement through platforms such as those proposed in this report.

Chapter 3: Economic Overview

Growth Trajectory

Senegal's economy has entered a structurally new phase. Real GDP growth averaged a healthy but unspectacular 4–5 per cent through the early 2020s, constrained by election-related uncertainty in 2023–24, before accelerating sharply to around 6.1 per cent in 2024 and an estimated 6.7–8.4 per cent in 2025, according to World Bank and national estimates, as the Sangomar offshore oil field and the Greater Tortue Ahmeyim (GTA) offshore gas project moved into commercial production. Non-oil growth, while more modest at around 3.5 per cent in 2024, still points to resilient underlying demand in agriculture, construction, and services once temporary political and weather-related disruptions are set aside.

Inflation and Monetary Environment

Inflation fell sharply from 5.9 per cent in 2023 to 0.8 per cent in 2024, reflecting lower global food and fuel prices and the disciplined monetary stance of the Central Bank of West African States (BCEAO), which manages monetary policy across the eight-member UEMOA zone under the CFA franc's fixed peg to the euro. This currency stability is a significant, and sometimes underappreciated, advantage for Indian exporters and investors, insulating transactions from the exchange-rate volatility common in many other African markets.

Fiscal Position and Public Debt

Senegal's fiscal position has come under scrutiny following the 2024 disclosure of previously understated public debt and deficit figures, which prompted a reassessment of the country's fiscal trajectory by the IMF and rating agencies. The overall fiscal deficit is estimated to have narrowed to around 8 per cent of GDP in 2025, aided by economic growth and improved tax administration, though central government debt remains elevated at close to 119 per cent of GDP. The government has engaged with the IMF on a fiscal consolidation and governance-reform programme, and investors should factor debt sustainability into medium-term risk assessments even as near-term growth prospects, driven by hydrocarbons, remain positive.

External Sector

Senegal's current account deficit, historically wide due to heavy reliance on imported fuel, food, and capital goods, narrowed markedly to around 12 per cent of GDP as rising oil and gas exports began to offset the import bill and global commodity prices moderated.

Exports of goods reached approximately USD 6.8–8 billion in 2024, led by refined petroleum, crude oil, gold, phosphoric acid, and groundnuts, while imports dominated by refined petroleum, crude oil (for domestic refining), rice, and vehicles stood at roughly USD 11–14 billion.

Indicator	2023	2024	2025 (est.)
Real GDP growth	~4.3%	~6.1%	~6.7–8.4%
Inflation (CPI, avg.)	5.9%	0.8%	~2.0%
Current account deficit (% of GDP)	~19.8%	~12%	narrowing further
Central government debt (% of GDP)	~99%	~122.7%	~118.9%
Fiscal deficit (% of GDP)	wide, under review	elevated	~8.1% (narrowing)

Major Trading Partners

On the export side, Senegal's principal markets are Mali, China, India, Switzerland (largely gold-related), and Spain; on the import side, China, France, Russia, India, and the United Arab Emirates are the leading suppliers. This pattern underscores both Senegal's regional trade role within the UEMOA/ECOWAS bloc (Mali being its largest single export destination) and its continued reliance on a diversified set of external suppliers for fuel, food, and manufactured goods a structure in which India already figures prominently and could expand further, particularly in rice, pharmaceuticals, and light manufactures.

Foreign Direct Investment

FDI inflows into Senegal have risen significantly over the past decade, driven overwhelmingly by hydrocarbon-sector investment from international oil and gas majors, alongside steady inflows into telecommunications, mining, and infrastructure (including port and toll-road concessions). Non-hydrocarbon FDI remains comparatively modest, and the Senegalese government, through its investment promotion agency APIX, has signalled a clear intent to diversify FDI sources and sectors under Senegal 2050 an opening that Indian investors, particularly in agro-processing, pharmaceuticals, and renewable energy, are well placed to pursue.

Economic Reforms

- Continued implementation of the OHADA harmonised business law framework, simplifying company registration, contract enforcement, and insolvency procedures across UEMOA member states.
- Reform of hydrocarbon-revenue management, including a Fund for Future Generations (FONSIS-linked mechanisms) intended to ensure oil and gas windfalls support long-term diversification rather than short-term consumption.
- IMF-supported fiscal consolidation and public debt transparency reforms following the 2024 debt-data revision.

- Ongoing digitalisation of tax administration and customs processes, aimed at improving revenue collection and reducing the cost of doing business.
- Renewed emphasis, under Senegal 2050, on import substitution in food staples (notably rice) and on local value addition in mining and agro-processing.

Growth Outlook

The IMF and World Bank both project Senegal to remain among the faster-growing economies in Sub-Saharan Africa through the second half of the 2020s, with growth moderating from the initial hydrocarbon-driven surge toward a more sustainable mid-to-high single-digit pace as oil and gas production stabilises and non-oil sectors—agriculture, construction, financial services, and digital industries—take up a larger share of growth. For Indian businesses, this trajectory implies a rapidly expanding consumer and industrial market, rising government capital expenditure on infrastructure, and a government actively seeking diversified foreign investment partners to balance its traditional reliance on French, Chinese, and Gulf capital.

Chapter 4: Major Economic Sectors

Senegal's economy rests on a diversified productive base spanning agriculture, fisheries, mining, the newly established hydrocarbon sector, renewable energy, infrastructure, manufacturing, digital services, and healthcare. This chapter reviews each sector in turn, assessing its current state, growth outlook, and the specific opportunities it presents for Indian industry.

1. Agriculture & Agribusiness

Agriculture employs close to half of Senegal's workforce, though it contributes only around 15–16 per cent of GDP, reflecting low productivity, heavy reliance on rain-fed cultivation, and limited mechanisation. Groundnuts remain the traditional cash crop and a significant export earner (roughly USD 300–350 million annually), alongside cotton, millet, sorghum, maize, and horticultural produce (mangoes, onions, tomatoes) increasingly grown for both domestic consumption and export to European markets. The government's food-sovereignty push under Senegal 2050 places particular emphasis on boosting rice self-sufficiency, expanding irrigated agriculture along the Senegal River Valley, and modernising groundnut and cereal value chains.

Opportunities for India

- Supply of agricultural machinery, tractors, and irrigation equipment suited to smallholder and medium-scale farming.
- Joint ventures in seed technology, fertiliser blending, and agri-input distribution.
- Investment in cold-chain and post-harvest storage infrastructure to reduce Senegal's high post-harvest losses.
- Contract farming and food-processing partnerships in groundnuts, cashew, and horticulture for both domestic and export markets.

How CCI India Can Contribute

- Organise an India–Senegal Agri-Tech Business Delegation featuring Indian tractor, irrigation, and agro-processing equipment manufacturers.
- Facilitate technology-transfer partnerships between Indian agricultural universities/ICAR institutions and Senegalese counterparts (ISRA, ANCAR).
- Support Indian MSMEs in establishing groundnut and horticulture processing joint ventures through market-entry advisory services.

2. Fisheries & Blue Economy

Fisheries are central to Senegal's economy, food security, and culture, contributing an estimated 3–4 per cent of GDP directly and supporting the livelihoods of hundreds of thousands of Senegalese in fishing, processing, and trade. Senegal is among Africa's leading seafood exporters, with octopus, shrimp, and various fish species shipped chiefly to European Union markets under fisheries partnership agreements. However, overfishing, competition from foreign industrial fleets, and inadequate aquaculture development remain persistent challenges, prompting government interest in sustainable fisheries management and aquaculture diversification.

Opportunities for India

- Aquaculture technology transfer, particularly in shrimp and tilapia farming, drawing on India's substantial aquaculture export experience.
- Cold-chain logistics, ice-plant, and fish-processing equipment supply.
- Joint ventures in value-added seafood processing for both the domestic Senegalese market and re-export.
- Marine engineering and fishing-vessel maintenance services, an area of established Indian shipbuilding and repair expertise.

How CCI India Can Contribute

- Connect Indian aquaculture and cold-chain technology firms with Senegalese fisheries cooperatives and the Ministry of Fisheries and Maritime Economy.
- Facilitate B2B matchmaking for fish-processing equipment suppliers at CCI India trade delegations.
- Support feasibility studies for Indian-Senegalese joint ventures in sustainable aquaculture.

3. Mining & Minerals

Senegal possesses a diverse mineral endowment: it is a significant global producer of phosphates (used in fertiliser manufacturing), an established gold producer with several operating mines in the eastern Kédougou region, and holds substantial zircon and titanium-mineral sands deposits along its coast, alongside limestone, marble, and industrial mineral resources.

Gold exports alone were valued at over USD 800 million in 2024, while phosphoric acid processed domestically by Industries Chimiques du Sénégal (ICS) remains a flagship value-added export.

Opportunities for India

- India's fertiliser industry, a major consumer of imported phosphoric acid and rock phosphate, can deepen long-term offtake and joint-venture arrangements with Senegalese phosphate producers.
- Indian mining-equipment and engineering-services companies can support exploration, extraction, and processing efficiency improvements.
- Value-addition partnerships in zircon and titanium mineral processing, an area with limited current domestic processing capacity in Senegal.
- Gold-sector services, including refining and assaying technology.

How CCI India Can Contribute

- Facilitate long-term phosphate/phosphoric acid offtake dialogues between Indian fertiliser majors and Senegalese producers.
- Organise a mining-sector B2B roundtable connecting Indian mining-equipment manufacturers with Senegalese operators and the Ministry of Mines and Geology.
- Support due-diligence and partner-identification services for Indian companies exploring mineral value-addition joint ventures.

4.Oil & Natural Gas

Senegal's energy landscape was transformed by the 2024–25 start of production at the Sangomar offshore oilfield (operated by Woodside Energy with Senegal's national oil company PETROSEN as partner) and the Greater Tortue Ahmeyim (GTA) offshore gas field, developed jointly with Mauritania and operated by BP. These projects have positioned Senegal as a nascent oil and LNG exporter, with hydrocarbon revenues expected to materially reshape public finances and the current account over the coming decade, provided they are managed within the governance framework envisaged under Senegal 2050.

Opportunities for India

- Indian oilfield-services, engineering, procurement and construction (EPC), and equipment-supply companies can pursue subcontracting opportunities within the Sangomar and GTA project ecosystems and their downstream supply chains.
- India's LNG-importing utilities and trading companies may explore long-term offtake discussions as Senegalese/Mauritanian LNG exports scale up.
- Downstream investment in refining, storage, and distribution infrastructure, an area where PETROSEN has signalled interest in partnerships.
- Capacity-building and technical training for Senegalese oil and gas sector personnel, an area where Indian public-sector energy companies have substantial institutional experience.

How CCI India Can Contribute

- Facilitate introductions between Indian energy EPC and oilfield-services companies and PETROSEN's local-content and supplier-development programmes.
- Support participation of Indian energy companies in Senegal's local-content compliance and vendor registration processes.
- Explore LNG offtake and downstream investment dialogues connecting Indian energy majors with Senegalese authorities.

5. Renewable Energy

Even as hydrocarbons dominate near-term headlines, Senegal has pursued an ambitious renewable-energy diversification agenda, with solar and wind capacity additions supported by international development finance and Senegal's status as a founding member of the International Solar Alliance. The government's energy strategy targets a substantially higher share of renewables in the national generation mix over the coming decade, alongside expanded rural electrification through mini-grid and off-grid solar solutions an area where Senegal's electrification rate, while improving, still lags urban levels significantly in rural regions.

Opportunities for India

- Indian solar-module and inverter manufacturers can supply utility-scale and off-grid solar projects, building on India's position as a leading global solar-manufacturing base.
- Mini-grid and rural electrification partnerships, leveraging Indian expertise in decentralised renewable energy deployment developed under India's own rural electrification programmes.
- EPC and O&M services for solar and wind projects, an area of substantial and growing Indian engineering capacity.
- Solar-pump and agri-solar solutions, directly supporting Senegal's irrigation and food-sovereignty priorities.

How CCI India Can Contribute

- Leverage India's International Solar Alliance leadership to connect Indian renewable-energy companies with Senegalese project developers and SENELEC (the national utility).
- Organise a renewable-energy investment roundtable showcasing Indian solar EPC, module manufacturing, and rural mini-grid capabilities.
- Support Indian companies in accessing concessional climate and development finance available for Senegalese renewable-energy projects.

6. Infrastructure & Construction

Senegal has made substantial infrastructure investments over the past decade, including the Dakar–Diamniadio–AIBD toll highway and the Blaise Diagne International Airport.

Regional Express Train (TER) connecting Dakar to Diamniadio, and ongoing expansion of the Port of Dakar. Nonetheless, significant gaps remain in secondary road networks, rural connectivity, affordable housing, and industrial-park infrastructure areas prioritised under Senegal 2050's territorial development and industrialisation objectives.

Opportunities for India

- Indian construction and EPC companies can participate in road, rail, and port-expansion tenders, often financed through multilateral or bilateral concessional facilities.
- Affordable-housing partnerships, drawing on Indian expertise in large-scale, cost-effective housing programmes.
- Industrial-park and Special Economic Zone development, supporting Senegal's manufacturing diversification goals.
- Smart-city and urban-infrastructure technology, including traffic management, water, and sanitation systems.

How CCI India Can Contribute

- Facilitate participation of Indian infrastructure and construction companies in APIX-registered investment and PPP project pipelines.
- Organise investor familiarisation visits to Senegal's industrial-park and Special Economic Zone projects for Indian construction and real-estate developers.
- Support Indian affordable-housing companies in exploring joint ventures aligned with Senegal's national housing programme.

7.Manufacturing

Senegal's manufacturing base, though growing, remains relatively narrow, concentrated in food and beverage processing, chemicals and fertilisers (notably ICS's phosphate-based products), light textiles, construction materials, and ship repair. The government's industrialisation strategy under Senegal 2050 explicitly seeks to expand local manufacturing and value addition reducing Senegal's heavy reliance on imported finished goods through incentives for export-oriented and import-substituting manufacturing investment.

Opportunities for India

- Light manufacturing joint ventures in textiles, packaging, and consumer goods, targeting both the Senegalese and broader UEMOA/ECOWAS market of over 190 million and 390 million consumers respectively.
- Chemicals and fertiliser-sector partnerships building on Senegal's existing phosphate-processing base.
- Automobile and auto-component assembly, an area where Indian commercial-vehicle brands already have a market presence.
- Machine-tool and capital-goods supply to support Senegal's broader industrialisation drive.

How CCI India Can Contribute

- Identify and promote Special Economic Zone opportunities to Indian light-manufacturing and textile companies through CCI India's investor facilitation desk.
- Support technology-transfer and joint-venture structuring for Indian manufacturers considering a West African production base in Senegal.
- Facilitate Indian auto-component and assembly investment dialogues, building on existing Indian automobile brand presence in the Senegalese market.

8. ICT & Digital Economy

Senegal has positioned itself as one of West Africa's more advanced digital economies, with a growing FinTech and mobile-money ecosystem, an active startup scene centred in Dakar, and government-led digitalisation initiatives spanning e-governance, tax administration, and identity systems. Senegal's Digital Senegal strategy and its participation in regional digital-integration initiatives align closely with India's own experience in building large-scale digital public infrastructure the India Stack model of digital identity, payments, and data exchange which has attracted growing interest from African governments, including Senegal, as a template worth studying.

Opportunities for India

- Digital public infrastructure partnerships: Indian expertise in digital identity, UPI-style payments, and e-governance platforms is directly relevant to Senegal's digitalisation goals.
- IT and BPO services delivery, leveraging India's global outsourcing expertise for Francophone-market service delivery.
- FinTech partnerships supporting Senegal's mobile-money and financial-inclusion agenda.
- AI, data-centre, and cloud-infrastructure investment, an emerging area of Senegalese government interest under its digital transformation strategy.

How CCI India Can Contribute

- Facilitate government-to-government dialogue on digital public infrastructure, drawing on India's Digital India / India Stack experience, in coordination with the Ministry of Electronics and Information Technology (MeitY).
- Organise IT/FinTech business delegations connecting Indian software and digital-payments companies with Senegalese startups and regulators.
- Support Indian IT companies in establishing Francophone-market delivery centres in Dakar, leveraging Senegal's bilingual talent pool.

9. Healthcare & Pharmaceuticals

Senegal's healthcare system, while more developed than several regional peers, continues to rely heavily on imported pharmaceuticals and medical devices, with domestic manufacturing capacity limited to a small number of local formulation units.

Public health priorities under Senegal 2050 include expanding universal health coverage, strengthening primary healthcare infrastructure, and reducing import dependence for essential medicines an agenda closely aligned with India's position as the world's largest supplier of generic medicines and vaccines.

Opportunities for India

- Expanded exports of Indian generic medicines, vaccines, and active pharmaceutical ingredients (APIs), building on already-established trade flows.
- Local formulation and packaging joint ventures, supporting Senegal's stated ambition to reduce pharmaceutical import dependence.
- Medical-device and diagnostic-equipment supply, an area with strong Indian manufacturing capacity.
- Medical tourism and telemedicine partnerships, leveraging India's globally recognised healthcare and hospital-management expertise.

How CCI India Can Contribute

- Facilitate registration and market-access support for Indian generic-pharmaceutical companies seeking to expand into the Senegalese and wider UEMOA market.
- Support feasibility assessments for Indian pharma companies exploring local formulation and packaging investment in Senegal.
- Organise healthcare-sector B2B delegations connecting Indian hospital groups, medical-device manufacturers, and telemedicine providers with Senegalese counterparts.

Chapter 5: Rice Sector: A Cornerstone of India–Senegal Trade

Importance of Rice to Senegal

Rice is Senegal's most important staple food, with per-capita consumption among the highest in West Africa broken rice, in particular, is deeply embedded in the national diet through dishes such as thiéboudienne, Senegal's national dish. Rice self-sufficiency has been a recurring policy objective across successive Senegalese governments for over a decade, given the food-security and balance-of-payments risks associated with heavy import dependence, and features prominently in the food-sovereignty pillar of Senegal 2050.

Domestic Production

Domestic rice production is concentrated in the Senegal River Valley (irrigated cultivation, chiefly in the Saint-Louis and Matam regions) and the Casamance and Anambé basin areas in the south (rain-fed and lowland cultivation). Despite sustained government investment in irrigation infrastructure and improved seed varieties, domestic production continues to fall well short of national consumption, leaving Senegal reliant on imports for a substantial share commonly estimated at 40–60 per cent of its total rice requirement, depending on the season and rainfall conditions.

Import Dependence and Major Suppliers

Senegal's rice imports were valued at over USD 700 million in 2024, making rice one of the country's single largest import categories alongside refined petroleum. India has historically been among Senegal's leading rice suppliers, particularly for broken (non-basmati) rice varieties suited to local consumption preferences, competing principally with Thailand, Vietnam, and other Asian exporters. Indian rice exports to Senegal were valued at roughly USD 145 million in 2024 within the broader cereals category, underscoring rice's position as the single largest line item in India's overall export basket to Senegal.

India's Role

India's position as the world's largest rice exporter, combined with competitive pricing, established shipping routes, and decades of trading relationships with West African importers, makes it a natural long-term partner for Senegal's rice supply chain both as an import source during the transition to greater self-sufficiency, and as a technology and investment partner in boosting domestic production and milling capacity. Periodic shifts in India's rice export policy (including export restrictions imposed at various points to manage domestic food security) have, however, at times prompted Senegalese importers to diversify sourcing, underscoring the importance of policy predictability and direct trade relationships for sustaining India's market share.

Government Policy

- Continued public investment in irrigation infrastructure in the Senegal River Valley, aimed at expanding double-cropping capacity for irrigated rice.
- Support for improved seed varieties and extension services through the Senegalese Institute for Agricultural Research (ISRA) and the National Agency for Agricultural and Rural Advisory Services (ANCAR).
- Periodic tariff and import-licensing adjustments intended to balance consumer affordability with support for domestic millers and producers.
- Senegal 2050's explicit food-sovereignty objective, targeting a substantially higher share of domestic production in total rice consumption over the coming decade.

Opportunities

- Continued and expanded trade in Indian non-basmati rice, supported by long-term supply agreements that offer Senegalese importers pricing and volume predictability.
- Indian investment in modern rice-milling and processing facilities within Senegal, adding value domestically rather than through raw-grain trade alone.
- Technology transfer in irrigation, mechanisation, and improved seed varieties, drawing on India's own experience in doubling rice productivity over recent decades.
- Public-private partnerships, potentially supported by Indian Lines of Credit, for irrigation infrastructure expansion in the Senegal River Valley.

How CCI India Can Contribute

- Facilitate long-term, structured supply agreements between Indian rice exporters/FCI-linked trading entities and major Senegalese importers and milling companies.
- Support Indian agri-processing companies in exploring rice-milling joint ventures within Senegal, adding value domestically and aligning with Senegal 2050's food-sovereignty goals.
- Advocate for policy predictability in India's rice export regime as it affects long-standing African trading partners, through appropriate government channels.
- Organise a dedicated India–Senegal Rice Trade & Investment Roundtable bringing together exporters, millers, financiers, and government stakeholders from both countries.

Chapter 6: Pharmaceutical Sector: Expanding India's Healthcare Footprint

Generic Medicines and Healthcare Imports

Senegal's pharmaceutical market remains heavily import-dependent, with domestic manufacturing capacity limited to a handful of local formulation units producing a narrow range of essential medicines. The great majority of Senegal's pharmaceutical needs including generic medicines, vaccines, and specialised formulations are met through imports from Europe (particularly France, reflecting historical trade ties), India, and, increasingly, China. India's pharmaceutical exports to Senegal were valued at over USD 70 million in 2024, spanning generic medicines, active pharmaceutical ingredients, and formulated drugs across therapeutic categories including anti-infectives, analgesics, and essential medicines on the WHO Model List.

Market Structure

Pharmaceutical distribution in Senegal operates through a regulated system centred on the national pharmaceutical supply agency (PNA Pharmacie Nationale d' Approvisionnement) for public-sector procurement, alongside a network of private wholesalers and pharmacies for retail distribution. Senegal's drug regulatory framework operates in coordination with the West African Health Organisation (WAHO) and increasingly with the African Medicines Agency (AMA), reflecting a broader regional push toward harmonised pharmaceutical regulation across ECOWAS and UEMOA member states a development that, once mature, could significantly ease Indian pharmaceutical companies' regulatory pathway across the wider West African market via a single Senegal-based registration.

India's Pharmaceutical Leadership

India supplies over half of global demand for generic medicines by volume and is the world's largest producer of vaccines, giving Indian pharmaceutical companies exceptional cost and scale advantages in serving price-sensitive public-health markets such as Senegal's.

India's WHO-prequalified manufacturing base, combined with an established track record of supplying African public-health programmes (including through the Global Fund, Gavi, and UNICEF procurement channels), positions Indian pharmaceutical companies as natural long-term partners for Senegal's public health system, well beyond simple bilateral trade.

Future Opportunities

- Expansion of Indian generic-medicine and API exports, supported by WHO-prequalification credentials and competitive pricing.
- Local formulation and packaging joint ventures within Senegal, reducing import dependence in line with government policy and positioning Indian companies to serve the broader UEMOA market from a Senegal-based facility.
- Participation in public-sector tenders through the PNA and multilateral procurement mechanisms (Global Fund, Gavi, UNICEF) that operate in Senegal.
- Medical-device and diagnostic-equipment supply, an underserved segment relative to pharmaceuticals.
- Telemedicine and medical-tourism partnerships, connecting Senegalese patients with Indian hospital networks for specialised tertiary care.

How CCI India Can Contribute

- Facilitate regulatory-pathway guidance and market-entry support for Indian generic-pharmaceutical companies seeking registration with Senegal's national drug regulatory authority.
- Support feasibility studies and partner identification for Indian pharmaceutical companies exploring local formulation and packaging investment in Senegal.
- Organise a dedicated Healthcare & Pharma Business Delegation connecting Indian pharma manufacturers, hospital groups, and medical-device companies with the PNA, Ministry of Health, and private distributors.
- Advocate, through appropriate diplomatic channels, for streamlined mutual recognition of Indian pharmaceutical quality certifications within the evolving ECOWAS/WAHO regulatory framework.

Chapter 7: Major Challenges Facing Senegal

Senegal's growth trajectory, while positive, is shaped by a set of structural challenges common to many developing, resource-transitioning economies. This chapter reviews eleven such challenges in detail, assessing their impact, the government's policy response, the business opportunity each presents, and how CCI India can help Indian industry engage constructively with these challenges as commercial opportunities rather than simply as risk factors. By identifying practical pathways for collaboration and investment, these challenges can be transformed into catalysts for innovation, sustainable development, and long-term economic partnership between India and Senegal.

1. Import Dependence for Food and Fuel

Impact

Senegal imports the majority of its rice, wheat, refined petroleum, and a significant share of other food staples, exposing the economy and household budgets to global commodity-price volatility and periodically widening the current account deficit and fiscal subsidy burden.

Government Response

Senegal 2050's food-sovereignty pillar targets substantially higher domestic production of rice and other staples; the government has also invested in domestic refining capacity to reduce reliance on imported refined fuel.

Business Opportunity

Indian rice, agri-input, and refining-technology companies can support both continued trade and Senegal's stated ambition to localise more of its food and energy supply chain.

How CCI India Can Contribute

- Facilitate structured, long-term supply agreements for Indian rice and agri-inputs that offer price and volume predictability.
- Support Indian companies exploring investment in domestic milling, storage, and fuel-refining capacity.

2. Low Industrialisation and Manufacturing Base

Impact

Manufacturing's limited share of GDP constrains formal-sector job creation, keeps Senegal reliant on imported finished goods, and limits the country's ability to capture value addition on its own raw-material exports.

Government Response

Senegal 2050 explicitly prioritises industrial diversification, with incentives for export-oriented and import-substituting manufacturing investment under the national Investment Code and APIX-administered Special Economic Zones.

Business Opportunity

Indian light manufacturing, textiles, packaging, and capital-goods companies can establish a West African production base in Senegal, serving both the domestic market and the wider UEMOA/ECOWAS trade area.

How CCI India Can Contribute

- Promote Special Economic Zone investment opportunities to Indian manufacturers through CCI India's investor facilitation desk.
- Support technology-transfer and joint-venture structuring for Indian manufacturing investment in Senegal.

3. Agricultural Productivity Gaps

Impact

Low mechanisation, limited access to improved seeds and fertiliser, and heavy dependence on rain-fed cultivation keep agricultural yields well below regional and global benchmarks, despite agriculture employing close to half the workforce.

Government Response

Government investment in irrigation expansion, extension services through ISRA and ANCAR, and input-subsidy programmes aim to lift productivity, particularly for rice, groundnuts, and horticultural crops.

Business Opportunity

Indian agricultural-machinery, irrigation-technology, and seed companies can support productivity gains directly, drawing on India's own experience raising cereal yields.

How CCI India Can Contribute

- Organise agri-tech business delegations connecting Indian equipment and input manufacturers with Senegalese cooperatives and research institutes.
- Facilitate technology-transfer partnerships between Indian and Senegalese agricultural research institutions.

4. Food Security

Impact

Despite recent progress, a meaningful share of the Senegalese population continues to face moderate or severe food insecurity, particularly in rural and drought-affected areas, exacerbated by climate variability.

Government Response

The food-sovereignty agenda under Senegal 2050, alongside social safety-net programmes, seeks to address both production-side and access-side dimensions of food security.

Business Opportunity

Indian food-processing, fortification, and agri-logistics companies can support more resilient and affordable domestic food supply chains.

How CCI India Can Contribute

- Support Indian food-processing and fortification companies in exploring partnerships aligned with national nutrition and food-security programmes.
- Facilitate cold-chain and agri-logistics investment dialogues.

5. Healthcare System Dependence on Imports

Impact

Reliance on imported pharmaceuticals and medical devices raises healthcare costs and creates supply-chain vulnerabilities, as seen during global disruptions to pharmaceutical and medical-supply logistics.

Government Response

The Ministry of Health has signalled interest in expanding local pharmaceutical manufacturing capacity and strengthening primary healthcare infrastructure under Senegal 2050's social-equity pillar.

Business Opportunity

Indian pharmaceutical and medical-device manufacturers are well positioned to support both continued affordable supply and local manufacturing partnerships.

How CCI India Can Contribute

- Facilitate regulatory and market-entry support for Indian pharmaceutical and medical-device companies.
- Organise healthcare-sector B2B delegations connecting Indian manufacturers with Senegalese health authorities.

6. Infrastructure Gaps

Impact

While Dakar and its surrounding region have benefited from major recent infrastructure investment, secondary cities and rural areas continue to face gaps in road connectivity, reliable power supply, and water and sanitation infrastructure, constraining regional economic development.

Government Response

Government and multilaterally financed infrastructure programmes continue to prioritise road, rail, port, and rural-electrification expansion, with growing use of public-private partnership structures to mobilise private capital.

Business Opportunity

Indian construction, EPC, and infrastructure-financing companies can participate in this expanding project pipeline, particularly through PPP and concessional-finance-backed structures.

How CCI India Can Contribute

- Facilitate participation of Indian infrastructure companies in APIX-registered PPP project pipelines.
- Organise investor familiarisation visits to priority infrastructure project sites for Indian companies.

7. Energy Costs and Access

Impact

Electricity tariffs in Senegal have historically been among the higher rates in the region, raising costs for industry, while rural electrification rates continue to lag urban levels, constraining rural economic activity.

Government Response

The government's energy strategy targets an expanded renewable-energy share in the generation mix and continued rural electrification through grid extension and off-grid/mini-grid solar solutions, alongside the medium-term prospect of lower energy costs from domestic gas-fired power generation.

Business Opportunity

Indian solar EPC, module manufacturing, and mini-grid companies, are directly positioned to support both cost reduction and access expansion.

How CCI India Can Contribute

- Leverage India's International Solar Alliance leadership to connect Indian renewable-energy companies with SENELEC and Senegalese project developers.
- Support Indian companies in accessing concessional climate finance for rural electrification projects.

8. Youth Unemployment

Impact

With roughly 60 per cent of the population under 25, and formal-sector job creation lagging the pace of new labour-market entrants, youth unemployment and underemployment remain among Senegal's most pressing social and economic challenges.

Government Response

Government programmes targeting entrepreneurship financing, vocational training, and digital-economy job creation aim to address the gap, alongside broader industrialisation and manufacturing-expansion efforts intended to generate formal employment.

Business Opportunity

Indian IT/BPO, manufacturing, and vocational-training partnerships can directly support formal job creation, drawing on India's own experience in large-scale skilling programmes.

How CCI India Can Contribute

- Facilitate skill-development partnerships between Indian training institutions and Senegalese vocational programmes.
- Support Indian IT/BPO and manufacturing investment that directly targets formal youth employment creation.

9. MSME Financing Gaps

Impact

Senegalese micro, small, and medium enterprises the backbone of the country's largely informal economy continue to face constrained access to affordable credit, limiting their capacity to formalise, scale, and integrate into wider value chains.

Government Response

Government and development-finance-backed credit guarantee schemes and MSME-support agencies aim to improve financing access, alongside digital financial-inclusion initiatives expanding mobile-money-based credit products.

Business Opportunity

Indian FinTech companies, with globally recognised expertise in digital lending and financial inclusion, can support Senegalese MSME financing innovation, while Indian MSME-focused technology and equipment suppliers can serve this large and underserved segment.

How CCI India Can Contribute

- Facilitate partnerships between Indian FinTech companies and Senegalese financial institutions on MSME digital-lending solutions.
- Support Indian MSME equipment and technology suppliers in reaching Senegalese small-business customers through targeted trade delegations.

10. Climate Change Vulnerability

Impact

Senegal's coastline, agriculture, and water resources are increasingly exposed to climate risks, including coastal erosion affecting Dakar and Saint-Louis, more variable rainfall affecting rain-fed agriculture, and periodic flooding in urban areas.

Government Response

Senegal is an active participant in international climate-finance mechanisms and has integrated climate resilience into infrastructure, agriculture, and coastal-management planning under Senegal 2050.

Business Opportunity

Indian climate-resilient infrastructure, water-management, and coastal-protection expertise, alongside renewable-energy investment, can support Senegal's adaptation agenda while accessing international climate finance.

How CCI India Can Contribute

- Support Indian companies with climate-resilient infrastructure and water-management expertise in accessing Senegalese climate-adaptation project pipelines.
- Facilitate participation in relevant multilateral climate-finance-backed tenders.

11. Limited Mineral Value Addition

Impact

Senegal continues to export a significant share of its mineral output particularly zircon, unprocessed ores, and to some extent gold in relatively raw form, forgoing the higher value and employment associated with domestic processing and refining.

Government Response

Senegal 2050's industrialisation agenda includes an explicit focus on increasing local value addition in mining, alongside continued phosphate-processing expansion through ICS.

Business Opportunity

Indian mineral-processing, refining, and downstream-manufacturing companies can partner with Senegalese mining operators to establish domestic processing capacity, capturing additional value for both parties.

How CCI India Can Contribute

- Facilitate joint-venture discussions between Indian mineral-processing companies and Senegalese mining operators.
- Organise a mining value-addition roundtable connecting Indian downstream-processing expertise with Senegal's Ministry of Mines and Geology.

Chapter 8: Investment Opportunities

This chapter consolidates the sector-wise investment opportunities identified in a single, prioritised reference for Indian investors, ranked broadly by near-term readiness and scale of opportunity.

Sector	Investment Opportunity	Indicative Entry Mode
Agriculture	Irrigation, mechanisation, seed and agri-input joint ventures	JV / equipment supply
Rice milling & processing	Value-added milling and storage facilities	Greenfield JV
Fisheries & aquaculture	Cold-chain, processing, aquaculture technology	JV / technology transfer
Mining (phosphates, gold, zircon)	Offtake agreements, processing/value-addition JVs	Offtake / JV
Oil & gas services	EPC subcontracting, oilfield services, downstream investment	Subcontract / JV
Renewable energy	Utility-scale and off-grid solar, mini-grids	EPC / IPP / JV
Infrastructure	Roads, industrial parks, affordable housing (PPP)	PPP / EPC

Sector	Investment Opportunity	Indicative Entry Mode
Manufacturing	Textiles, packaging, light engineering, auto assembly	Greenfield / JV
ICT & digital economy	FinTech, digital public infrastructure, IT delivery centres	JV / wholly-owned subsidiary
Pharmaceuticals	Local formulation and packaging plants	Greenfield JV

Investment Framework and Incentives

Senegal's Investment Code, administered through APIX, offers qualifying investors incentives including corporate tax reductions, customs duty exemptions on capital equipment imports, and export-oriented benefits, particularly for investment in priority sectors aligned with Senegal 2050 and for projects located in designated industrial or Special Economic Zones. Senegal's membership of OHADA provides a harmonised, UEMOA-wide commercial legal framework, reducing legal complexity for investors operating across multiple West African markets from a Senegalese base.

Risk Considerations

- Elevated public debt levels (~119% of GDP) and an ongoing IMF-monitored fiscal consolidation programme warrant careful structuring of any government-counterparty or PPP arrangements.
- Currency stability under the CFA franc's euro peg is a significant mitigant against exchange-rate risk, though repatriation and regional currency-union dynamics should be factored into financial planning.
- Regulatory and land-tenure due diligence remains important for greenfield investment, particularly in agriculture and infrastructure projects involving customary land arrangements.
- Regional security dynamics in the wider Sahel, while not directly affecting Senegal's own internal stability, warrant standard supply-chain and logistics risk assessment for cross-border projects.

How CCI India Can Contribute

- Provide Indian investors with pre-investment briefings on APIX incentive structures, sector-specific regulatory requirements, and land and PPP due-diligence considerations.
- Facilitate introductions to Senegalese legal, financial, and local-partner advisory networks for Indian companies structuring their first Senegal investment.
- Maintain an updated CCI India investment opportunity tracker for Senegal, refreshed through the proposed Senegal and Francophone West Africa Desk.

Chapter 9: Trade Opportunities Between India and Senegal

Current Trade Profile

Bilateral trade between India and Senegal totalled an estimated USD 1.6–1.9 billion in 2024, with India running a trade surplus driven by its exports of cereals (rice), cotton, pharmaceuticals, machinery, and vehicles, against Senegalese exports to India concentrated in gold, phosphoric acid, and other minerals. This structure India supplying finished and semi-finished goods and food staples, Senegal supplying raw materials and minerals is typical of India's broader African trade pattern, but leaves considerable room for diversification and value-chain deepening on both sides.

India's Exports to Senegal (2024)	Approx. Value
Cereals (chiefly rice)	~USD 249 million
Cotton	~USD 106 million
Pharmaceutical products	~USD 72 million
Machinery, boilers, mechanical appliances	~USD 67 million
Meat and edible meat offal	~USD 54 million
Electrical and electronic equipment	~USD 50 million
Vehicles (non-rail)	~USD 43 million
Plastics	~USD 42 million

Export Opportunities for India

- Rice and cereals: continued growth potential through structured long-term supply agreements.
- Generic pharmaceuticals and medical devices: significant headroom given Senegal's import dependence.
- Agricultural machinery, irrigation equipment, and agri-inputs, supporting Senegal's productivity and food-sovereignty agenda.
- Textiles, garments, and consumer goods, targeting both Senegalese consumers and the wider UEMOA/ECOWAS re-export market.
- Renewable-energy equipment (solar modules, inverters), automobiles and auto-components, and construction materials.

Import Opportunities for India

- Phosphoric acid and rock phosphate, supporting India's fertiliser industry's long-term raw-material security.
- Gold and other minerals, within the framework of India's existing bullion-trade relationships.
- Groundnuts and horticultural produce, for India's edible-oil and food-processing sectors.

- Seafood (particularly value-added processed products), subject to sanitary and phytosanitary alignment.

Sector Mapping and Trade Facilitation

A structured approach to deepening India–Senegal trade would combine continued growth in existing high-volume categories (rice, pharmaceuticals) with deliberate diversification into underexploited categories such as agricultural machinery, renewable-energy equipment, and processed food products, alongside efforts to build direct shipping and logistics linkages that reduce reliance on European transshipment hubs for India–Senegal cargo.

Future Trade Potential

Should current growth trends continue and targeted diversification succeed, bilateral trade could plausibly grow toward USD 2.5–3 billion over the medium term, particularly if pharmaceutical local-formulation investment, expanded rice-value-chain cooperation, and renewable-energy equipment trade materialise as outlined in this report. A bilateral Preferential Trade Agreement or the conclusion of an India–ECOWAS/UEMOA trade framework, should either be pursued, would further support this trajectory by reducing tariff barriers on priority product categories.

How CCI India Can Contribute

- Establish a standing CCI India trade facilitation cell for India–Senegal trade documentation, buyer-seller matchmaking, and logistics guidance.
- Organise annual Reverse Buyer-Seller Meets bringing Senegalese importers (rice, pharmaceuticals, agri-inputs) to India, and Indian exporters to Dakar.
- Advocate, through appropriate government channels, for exploration of a bilateral or regional preferential trade arrangement to reduce tariff friction.
- Support the development of more direct shipping and logistics linkages between Indian and Senegalese ports.

Chapter 10: Role of CCI India

The preceding chapters have identified a wide range of trade, investment, and technology-transfer opportunities between India and Senegal, alongside the structural challenges that must be navigated to realise them. This chapter sets out, in practical and actionable terms, how the Chamber of Commerce and Industry of India intends to serve as the principal institutional bridge translating this opportunity map into measurable outcomes for Indian and Senegalese businesses alike.

1. Trade Promotion

CCI India will actively promote India–Senegal trade through dedicated market-intelligence bulletins, participation in relevant trade fairs (including Senegal's biennial FIDAK international trade fair in Dakar), and direct outreach to Indian exporters in priority categories rice, pharmaceuticals, agricultural machinery.

Implementation Framework

Publish a quarterly India–Senegal trade bulletin; secure an Indian pavilion presence at FIDAK; maintain a curated directory of verified Senegalese importers and distributors for Indian exporters.

Expected Outcome

Increased visibility and deal flow for Indian exporters, reduced information asymmetry for first-time market entrants.

2. Investment Facilitation

Building on the opportunity CCI India will offer Indian investors structured pre-investment briefings, introductions to APIX and relevant Senegalese ministries, and guidance on incentive structures, land due diligence, and joint-venture partner identification.

Implementation Framework

Establish a standing Investment Facilitation Desk with dedicated Senegal-market expertise; formalise a Memorandum of Understanding with APIX for expedited investor referral.

Expected Outcome

Shorter investment-decision timelines for Indian companies and a documented pipeline of Indian investment interest for Senegalese authorities.

3. Business Matchmaking (B2B)

CCI India will operate a structured business-matchmaking service pairing Indian companies with vetted Senegalese counterparts across the priority sectors identified in this report, moving beyond generic trade-delegation networking toward outcome-oriented, pre-qualified introductions.

Implementation Framework

Maintain a bilingual (English/French) database of Senegalese business contacts by sector; conduct pre-visit matchmaking calls ahead of every delegation.

Expected Outcome

Higher conversion rates from delegation participation to concluded agreements.

4. Government Engagement (B2G)

CCI India will maintain structured engagement with both the Embassy of the Republic of Senegal in New Delhi and the Embassy of India in Dakar, as well as relevant Senegalese ministries (Trade, Industry, Agriculture, Energy, Health), to keep Indian industry informed of policy developments and to advocate for issues affecting bilateral commerce.

Implementation Framework

Institutionalise biannual CCI India–Embassy of Senegal consultations; participate in relevant India-Africa policy forums.

Expected Outcome

Faster resolution of regulatory or market-access issues affecting Indian businesses; stronger institutional voice for private-sector concerns.

5.Trade Delegations

CCI India will organise sector-focused outbound trade delegations to Dakar and inbound delegations of Senegalese buyers and officials to India, sequenced around the priority sectors.

Implementation Framework

Target at least one outbound and one inbound delegation annually, beginning with agri-processing/rice and pharmaceuticals as first-wave priority sectors.

Expected Outcome

Sustained, cumulative relationship-building rather than one-off engagement.

6.Reverse Buyer-Seller Meets

Recognising that Senegalese importers are often better placed to travel to India than the reverse for smaller Indian exporters, CCI India will organise Reverse Buyer-Seller Meets bringing Senegalese rice, pharmaceutical, and agri-input importers directly to Indian manufacturing hubs.

Implementation Framework

Coordinate with Indian export-promotion councils (e.g., for rice and pharmaceuticals) to co-host reverse meets aligned with existing industry events.

Expected Outcome

Direct, cost-efficient market access for Indian MSME exporters that lack the resources for outbound travel.

7.Investment Summits

CCI India will support and, where appropriate, co-organise an India–Senegal Investment Summit, bringing together Indian corporates, Senegalese government agencies, and multilateral development-finance institutions to showcase priority investment opportunities.

Implementation Framework

Target a biennial summit, alternating between New Delhi and Dakar, anchored by sector-specific breakout sessions.

Expected Outcome

A recurring, high-visibility platform for announcing and tracking investment commitments, while showcasing successful partnerships, facilitating stakeholder engagement, and reinforcing long-term accountability for the implementation of bilateral trade and investment initiatives.

8.CEO Forums

CCI India will propose the establishment of an India–Senegal CEO Forum, bringing together senior business leaders from both countries to provide sustained, high-level private-sector input into the bilateral economic relationship.

Implementation Framework

Identify founding member companies from both sides across priority sectors; convene an inaugural meeting alongside the first Investment Summit.

Expected Outcome

A durable, senior-level channel for private-sector advocacy and deal-origination.

9.Joint Business Councils

CCI India will work toward formalising an India–Senegal Joint Business Council, potentially in partnership with the Chamber of Commerce, Industry and Agriculture of Dakar (CCIAD) and relevant Senegalese trade associations, to provide institutional continuity beyond individual delegations and events.

Implementation Framework

Negotiate a Memorandum of Understanding with CCIAD; establish joint working groups for priority sectors.

Expected Outcome

Institutionalised, ongoing bilateral business dialogue independent of any single event or delegation.

10.Startup Collaboration

Given Senegal's active Dakar-based startup ecosystem, particularly in FinTech and AgriTech, CCI India will facilitate connections between Indian startup accelerators, venture investors, and Senegalese counterparts, supporting cross-border pilot partnerships.

Implementation Framework

Organise a Startup Bridge programme connecting Indian and Senegalese incubators/accelerators; facilitate pilot-project matchmaking in FinTech and AgriTech.

Expected Outcome

Early-stage cross-border collaboration that can mature into larger technology-transfer or investment relationships.

11.Technology Transfer

Across agriculture, renewable energy, pharmaceuticals, and digital public infrastructure, CCI India will facilitate structured technology-transfer partnerships between Indian institutions/companies and Senegalese counterparts, moving beyond pure trade toward capability-building relationships.

Implementation Framework

Facilitate institutional partnerships (e.g., Indian agricultural universities with ISRA; Indian digital-infrastructure agencies with Senegalese e-governance bodies).

Expected Outcome

Deeper, more durable partnerships less exposed to short-term trade-policy shifts.

12.Manufacturing Partnerships

CCI India will support Indian manufacturers evaluating a Senegal-based production footprint, connecting them with APIX's Special Economic Zone programme and relevant Senegalese industrial partners.

Implementation Framework

Maintain a manufacturing-investment prospectus for Senegal, updated with current SEZ incentives and available industrial land.

Expected Outcome

Increased Indian manufacturing FDI into Senegal, supporting both countries' industrialisation objectives.

13.Agritech Partnerships

CCI India will connect Indian agri-machinery, irrigation-technology, and seed companies with Senegalese cooperatives, ISRA, and ANCAR, supporting both trade and productivity-enhancing technology transfer.

Implementation Framework

Organise an annual Agritech Business Delegation timed to align with Senegal's agricultural planning calendar.

Expected Outcome

Measurable productivity and trade impact in Senegal's largest employment sector.

14.Pharmaceutical Collaboration

As detailed in Chapter 6, CCI India will provide dedicated regulatory and market-entry support for Indian pharmaceutical companies, alongside facilitation of local formulation and packaging joint ventures.

Implementation Framework

Establish a Pharma Market Access working group in coordination with Indian pharmaceutical export-promotion bodies.

Expected Outcome

Expanded Indian generic-medicine market share and progress toward local manufacturing investment.

15. Renewable Energy Partnerships

Leveraging India's International Solar Alliance leadership, CCI India will connect Indian solar and renewable-energy companies with SENELEC and Senegalese project developers.

Implementation Framework

Co-host a renewable-energy investment roundtable with the International Solar Alliance secretariat.

Expected Outcome

Increased Indian participation in Senegal's utility-scale and rural-electrification renewable-energy pipeline.

16. Mining Partnerships

CCI India will facilitate offtake and value-addition dialogues between Indian fertiliser and mining companies and Senegalese producers and the Ministry of Mines and Geology.

Implementation Framework

Organise a mining-sector B2B roundtable connecting Indian mining-equipment and processing companies with Senegalese operators.

Expected Outcome

Deeper, longer-term raw-material security for Indian industry and increased Senegalese value addition.

17. Infrastructure Collaboration

CCI India will support Indian infrastructure and construction companies in accessing APIX-registered PPP project pipelines.

Implementation Framework

Organise investor familiarisation visits to priority infrastructure projects; maintain an updated PPP project tracker for Senegal.

Expected Outcome

Increased Indian participation in Senegal's infrastructure investment pipeline.

18. Digital Economy Collaboration

CCI India will facilitate government-to-government and company-to-company engagement on digital public infrastructure, FinTech, and IT service delivery, while promoting technology partnerships, knowledge exchange, capacity building, and the adoption of scalable digital solutions that support inclusive economic growth and digital transformation in Senegal.

Implementation Framework

Coordinate with MeitY and Indian digital-infrastructure agencies on potential government-to-government knowledge-sharing engagement with Senegal.

Expected Outcome

Positioning of Indian digital public infrastructure expertise as a preferred model for Senegal's digitalisation agenda.

19. MSME Partnerships

CCI India will support Indian MSMEs seeking to enter the Senegalese market with tailored, lower-cost market-entry advisory services, recognising that MSMEs often lack the resources of larger corporates for independent market research. This support will include business matchmaking, regulatory guidance, sector-specific market intelligence, and connections with reliable local partners to facilitate successful and sustainable market entry.

Implementation Framework

Develop a simplified MSME market-entry toolkit for Senegal; offer subsidised participation in reverse buyer-seller meets for MSME members.

Expected Outcome

Broader-based Indian private-sector participation in the Senegal opportunity, beyond large corporates alone.

20. Women Entrepreneurship

CCI India will support connections between women-led Indian enterprises and Senegal's own active women's entrepreneurship networks, particularly in agri-processing, textiles, and services.

Implementation Framework

Include dedicated women-entrepreneur tracks within trade delegations and the proposed CEO Forum.

Expected Outcome

More inclusive participation in the bilateral trade and investment relationship.

21. Capacity Building

CCI India will support skill-development and training partnerships between Indian institutions and Senegalese vocational and technical training bodies, complementing existing ITEC-programme cooperation, while fostering industry-ready talent and knowledge exchange.

Implementation Framework

Facilitate institutional partnerships between Indian skill-development bodies and Senegalese vocational training centres.

Expected Outcome

A more skilled Senegalese workforce better positioned to support Indian manufacturing and services investment.

22.Export Promotion

CCI India will work with Indian export-promotion councils across priority sectors (rice, pharmaceuticals, agri-machinery, textiles) to ensure Senegal features prominently in their African market-development strategies.

Implementation Framework

Coordinate joint outreach programmes with relevant Export Promotion Councils.

Expected Outcome

Coordinated, non-duplicative export-promotion effort across Indian trade bodies.

23.Investor Facilitation

For Indian companies that have made an investment decision, CCI India will provide continued post-entry support, including introductions to local legal, financial, and operational service providers.

Implementation Framework

Maintain a vetted directory of Senegalese professional-services providers for referral to Indian investors.

Expected Outcome

Reduced post-entry friction and higher investment-retention rates.

24.Policy Dialogue

CCI India will engage with both governments on policy issues affecting bilateral commerce, including the potential for a bilateral Investment Promotion and Protection Agreement and Double Taxation Avoidance Agreement.

Implementation Framework

Prepare and submit policy position papers to relevant government departments as issues arise.

Expected Outcome

A more supportive policy architecture for bilateral trade and investment over time.

25.Ease of Doing Business Support

CCI India will provide Indian companies with practical guidance on navigating Senegalese business registration, customs, and regulatory processes, drawing on APIX's single-window investment facilitation services.

Implementation Framework

Publish and periodically update a practical 'Doing Business in Senegal' guide for Indian companies.

Expected Outcome

Faster, lower-friction market entry for Indian businesses.

26. Market Entry Assistance

Beyond general guidance, CCI India will offer tailored market-entry assistance partner identification, distributor vetting, and initial market assessment for Indian companies at the early stages of Senegal market evaluation.

Implementation Framework

Offer a structured market-entry advisory package as part of CCI India's Senegal Desk services.

Expected Outcome

Higher-quality, better-informed market-entry decisions by Indian companies.

27. Joint Exhibitions

CCI India will explore co-organising joint sector-specific exhibitions in India and Senegal, showcasing Indian products and technologies alongside Senegalese sourcing and partnership opportunities.

Implementation Framework

Evaluate feasibility of a dedicated India-Senegal Trade Exhibition, alongside continued Indian participation in FIDAK.

Expected Outcome

Higher-visibility, sector-focused showcasing beyond generic trade-delegation formats.

28. International Conferences

CCI India will ensure Senegal-focused content features in relevant India-Africa conferences and forums that CCI India participates in or organises, keeping the Senegal opportunity visible within the broader India-Africa business community.

Implementation Framework

Include a dedicated Senegal/West Africa session at CCI India's annual Africa-focused conference programming.

Expected Outcome

Sustained visibility for the Senegal opportunity within India's broader Africa engagement.

29. Business Intelligence Reports

This Knowledge Paper represents the first in what CCI India intends as a periodically updated series of Senegal market-intelligence products, ensuring Indian industry has access to current, reliable information.

Implementation Framework

Commit to a biennial update cycle for this Knowledge Paper, supplemented by shorter interim sector briefs as material developments occur.

Expected Outcome

A living, credible reference resource rather than a one-time publication.

30. Sector-Specific Roundtables

CCI India will convene periodic, smaller-format roundtables on individual priority sectors (rice, pharmaceuticals, renewable energy, mining), allowing for more detailed, technical engagement than larger delegation formats permit. These focused discussions will facilitate problem-solving, identify sector-specific investment opportunities, and strengthen collaboration between policymakers, industry leaders, and technical experts.

Implementation Framework

Schedule quarterly sector roundtables, rotating across the priority sectors.

Expected Outcome

Deeper, more technically substantive engagement complementing broader delegation and summit activity.

31. Institutional Partnerships

CCI India will pursue formal institutional partnerships with the Embassy of the Republic of Senegal in India, the Embassy of India in Dakar, APIX, and the Chamber of Commerce, Industry and Agriculture of Dakar (CCIAD), providing the institutional scaffolding for all the initiatives outlined above. These partnerships will ensure sustained coordination, effective implementation, and long-term continuity of bilateral trade, investment, and capacity-building initiatives.

Implementation Framework

Formalise Memoranda of Understanding with each institution within the first year following publication of this Knowledge Paper.

Expected Outcome

A durable institutional foundation ensuring continuity of engagement beyond individual personnel or leadership changes.

Summary: CCI India's Institutional Commitment

Taken together, the initiatives outlined in this chapter represent a comprehensive, multi-year institutional commitment by CCI India to serving as the principal private-sector bridge between India and Senegal spanning trade facilitation, investment promotion, technology transfer, capacity building, and sustained policy dialogue. Through these coordinated efforts, CCI India aims to foster long-term economic cooperation, accelerate bilateral investments, and create enduring value for businesses and institutions in both countries.

Chapter 11: Strategic Roadmap

This chapter sets out a phased roadmap for deepening the India–Senegal economic partnership, sequencing the initiatives, into short-term (0–12 months), medium-term (1–3 years), and long-term (3–6 years) horizons. The roadmap provides a structured framework for prioritising actions, mobilising institutional support, and fostering stronger collaboration between governments, businesses, and development partners. By adopting a phased implementation approach, it seeks to ensure that early achievements build momentum for larger strategic investments and long-term economic cooperation, creating sustainable and mutually beneficial outcomes for both countries.

Short-Term (0–12 Months)

- Establish CCI India's Senegal and Francophone West Africa Desk, with a dedicated market-intelligence and facilitation function.
- Publish and disseminate this Knowledge Paper to relevant government ministries, the Embassy of Senegal in India, the Embassy of India in Dakar, and Indian industry associations.
- Organise the first sector-specific business delegation (recommended: agri-processing and rice, given existing trade depth) and the first Reverse Buyer-Seller Meet.
- Initiate formal institutional engagements with key Senegalese government agencies, investment promotion bodies, and business chambers to establish a structured framework for long-term trade and investment cooperation.
- Develop a comprehensive pipeline of high-potential India–Senegal investment and trade opportunities, accompanied by sector-specific market intelligence and investor outreach programmes.

Medium-Term (1–3 Years)

- Convene the inaugural India–Senegal CEO Forum and formally establish the Joint Business Council.
- Host the first India–Senegal Investment Summit, showcasing priority opportunities.
- Support conclusion of the first pharmaceutical local-formulation joint venture and at least one rice-milling or agri-processing greenfield investment.
- Expand sector-specific roundtables to cover renewable energy, mining, and digital economy.
- Launch a structured India–Senegal Business Partnership Programme to facilitate B2B collaborations, joint ventures, technology transfer, and long-term investment partnerships across priority sectors.
- Establish an India–Senegal Centre of Excellence for Trade, Innovation, and Capacity Building to promote research collaboration, executive training, policy dialogue, and knowledge exchange across priority economic sectors.

Long-Term (3–6 Years)

- Institutionalise a biennial India–Senegal Investment Summit, alternating between New Delhi and Dakar.
- Support the establishment of an Indian manufacturing or agro-processing cluster within a Senegalese Special Economic Zone, serving the wider UEMOA/ECOWAS market.
- Target bilateral trade growth toward USD 2.5–3 billion, with a materially more diversified composition beyond rice and minerals.
- Support Senegal's positioning as India's principal Francophone West Africa trade and investment hub, with CCI India's Senegal Desk serving as a template for similar engagement with other UEMOA markets.
- Establish a long-term India–Senegal Innovation and Investment Partnership Framework to promote sustained collaboration in advanced manufacturing, digital technologies, renewable energy, skills development, and strategic infrastructure projects.

Horizon	Key Milestones
Short-term (0–12 months)	Senegal Desk established; first delegation and reverse buyer-seller meet; MoUs initiated with APIX and CCIAD
Medium-term (1–3 years)	CEO Forum and Joint Business Council launched; first Investment Summit; first pharma/agri-processing JV concluded
Long-term (3–6 years)	Biennial Investment Summit institutionalised; Indian SEZ cluster established; bilateral trade toward USD 2.5–3 billion

Conclusion

Senegal stands at a genuine inflection point. A stable, mature democracy entering its hydrocarbon era, pursuing an ambitious national transformation agenda through Senegal 2050, and strategically positioned as the gateway between Europe, the Americas, and West Africa, Senegal offers Indian industry a partner whose economic trajectory and policy priorities align closely with India's strengths in agriculture, generic pharmaceuticals, renewable energy, digital public infrastructure, manufacturing, and technology-driven innovation.

Despite this encouraging momentum, the investment relationship remains significantly below its true potential. Opportunities across agriculture and agri-processing, pharmaceutical manufacturing, renewable energy, mining and mineral value addition, digital public infrastructure, logistics, infrastructure development, and skills collaboration present a broad and largely untapped avenue for long-term economic cooperation that can generate sustainable growth, employment, and shared prosperity for both nations.

The Chamber of Commerce and Industry of India is committed to serving as the institutional bridge that transforms this potential into measurable outcomes through sustained trade facilitation, investment promotion, business matchmaking, strategic partnerships, and continuous policy dialogue. We look forward to working closely with the Embassy of the Republic of Senegal in India, the Embassy of India in Dakar, APIX, the Chamber of Commerce, Industry and Agriculture of Dakar, and the wider Indian and Senegalese business communities to build a substantial, durable, and mutually beneficial economic partnership between our two nations in the years ahead.

Looking ahead, the next phase of India–Senegal cooperation should be defined not merely by expanding trade volumes, but by fostering deeper investment partnerships, technology transfer, industrial collaboration, innovation, and human capital development. By leveraging their complementary strengths and shared commitment to inclusive and sustainable growth, India and Senegal are well positioned to create a resilient economic partnership that contributes to regional development, strengthens South–South cooperation, and serves as a model for future India–Africa economic engagement.

In this evolving landscape, stronger institutional coordination and private-sector engagement will be critical to converting shared aspirations into concrete projects and commercial outcomes. A structured framework for regular business-to-business and business-to-government engagement can help identify high-impact opportunities, address market-access challenges, facilitate investment pipelines, and accelerate joint ventures across priority sectors. CCI India remains committed to supporting this process by connecting enterprises, enabling knowledge exchange, facilitating market intelligence, and promoting partnerships that extend beyond individual transactions. Through sustained collaboration, India and Senegal can build a forward-looking economic relationship grounded in trust, innovation, shared value creation, and long-term development.

THANK YOU

CCI India sincerely thanks Your Excellency for the warm hospitality and gracious interaction with our team. We greatly value the opportunity to discuss strengthening India–Senegal bilateral trade and economic relations and look forward to deepening cooperation, expanding business engagement, and creating new avenues for trade, investment, and mutually beneficial partnerships between the two countries.

Collaboration Pave the Way for Shared Prosperity and Sustainable Growth
